

Valve enrichment for disease-trait gene panels

N=2000 permutations · BH-FDR

Familial thoracic aortic aneurysm and aortic dissection

** (k=9)

Valve defects

** (k=74)

Atrioventricular septal defect

** (k=23)

Malformation of the outflow tract

** (k=57)

PCGC DeNovoVariants

** (k=61)

Single ventricle disease

* (k=17)

Atrial septal defect

** (k=88)

Ventricular septal defect

(k=34) ns

DilatedCardiomyopathy

(k=41) ns

HypertrophicCardiomyopathy

(k=27) ns
